Task 2:iOS Pairing

What is the name of a type of certificate that is used when an iPhone and a device pair together?

Ans: Trust certificates

What is the expiry timer on these certificates?

Ans: 30 days

Task 3:Preserving Evidence

What is the name of the Apple feature that allows a device to be remotely wiped?

Ans: find my

What “type” of backup would we perform if we wanted to backup the entire device

Ans: encrypted

What is the name of an important piece of equipment that can block all signals, preventing the device from being remotely wiped?

Ans: Faraday Bag

Task 4:The iOS Filesystem

After March 2017, what filesystem do all iPhones use?

Ans: apfs

What is the name of the “domain” that stores all files relating to the operating system?

Ans: system

Task 5:Artefacts

In what directory of a backup is the Address Book (contacts) stored?

Ans: HomeDomain/Library/AddressBook

In what directory of the iPhone are passwords and certificates stored? This is known as the Keychain.

Ans: /var/keychains

Task 6:Analysis

What is the name of the cross-platform toolkit that can interact with iOS devices? This is a CLI tool.

Ans: libimobiledevice

If we wanted to do a full iPhone backup using the aforementioned tool, with the directory being “backup”, what would our command look like?

Ans: idevicebackup2 backup — full ./backup

Task 7: Practical Operation Timely Manner

What is the name (SSID) of the Wi-Fi network the iPhone connected to?

Ans: OneMinuteStaff

What are the saved contact details for the competitor?

Answer format: Firstname,Lastname

The table “ABPerson” contains the contact information. You can look for the contact who is part of the OneMinute organisation.

Ans: Wayne,Garcey

On what day was the exchange of information to take place?

Ans: 30/03/2024

There is a calendar entry for this. You can sort by location id being true (1) in the “CalendarItem” table if you are stuck.

THANK YOU FOR READING!!! ❤️ 🙌
